

Creating Your Concept Map

Using your notes create a concept map. To begin, go to www.bubbl.us and start a new map. In the main idea box, type the word "Matter". You may choose to enlarge the font or otherwise distinguish this main idea box. Play around with the program so you know how to add link (side and bottom), change font/color/size/placement, add labels to the link lines, etc...

Use the words below in your map. Print the map and hand in.

Air

Carbon (C)

Chocolate chip cookie

Compound

Element

Heterogeneous

Homogeneous

Mixture

Oxygen (O)

Pure Substance

Salt water

Sodium chloride (NaCl)

Soil

Water (H₂O)
